<p>I would express my strong objection to this application on the basis that the applicant has deliberately misled the council planning department. He has previously constructed works in accordance with the original approved application, demolished these works and re-constructed to a footprint and height far in excess of the original approved application. He has then re-applied hoping that the council will grant approval. This grossly undermines the whole process and I believe that the applicant is taking for granted the good work that the planning department undertake. I have made previous submissions on the validity of the works being constructed and which resulted in you issuing a TSN. I would request that the planning department do not approve this latest application and revert back to the original. The revised application results in a height which is some 2-3 metres higher than the original application which is not acceptable for a conservation area. I will be submitting more further and detailed particulars prior to the closing date in order to support my objection. I trust that you will take into account my previous submissions, which are a matter of record.</p>
