<p>The local plan aims to increase good-quality housing for families etc. Student accomodation cannot be seen as that and therefore this land should be used to further the key government strategy.</p> <p>This land would be better suited for a smaller number of rental properties, in a similar style to that which is proposed, but for a more general market such as young professionals or young families.</p> <p>This application seeks to only maximise profit not to look at the wider housing needs of Huddersfield.</p>
