Subject:

Dear Kerri,

I would like you to note my objections and observation to the above application.

I have been made aware of the above application which, when I tried to find it , it did not come up as the address had been placed in wrong so I am unsure how many would be aware of it?

The application initially looks innocent, but when I have read it , it refers to the land being construction and the need for more housing.

This field has always been agricultural, other than a horrid abandoned small container that was dumped in there some years ago.

It is not construction land and this is misleading and wrong.

it is used for farming.

The application is for one house, which would be wholly out of kilter with the rest of the area.

I see not reason why there should be an exceptional case for the applicant to change the status of the field from green to grey so he can build a very inappropriate house.

The applicant writes of the housing needs. This area is NOT sustainable for development, there are no amenities at all in the area.

This seems to be an application about trying to make money rather than provide homes.

It appears underhand and inappropriate.

I'd be greatfull for you to email me back so i know you have received this email, much appreciated.

Regards
