Householder Planning Application

24 Deighton Road, Huddersfield HD2 1UF

Proposed Drop Kerb / vehicular crossing facility

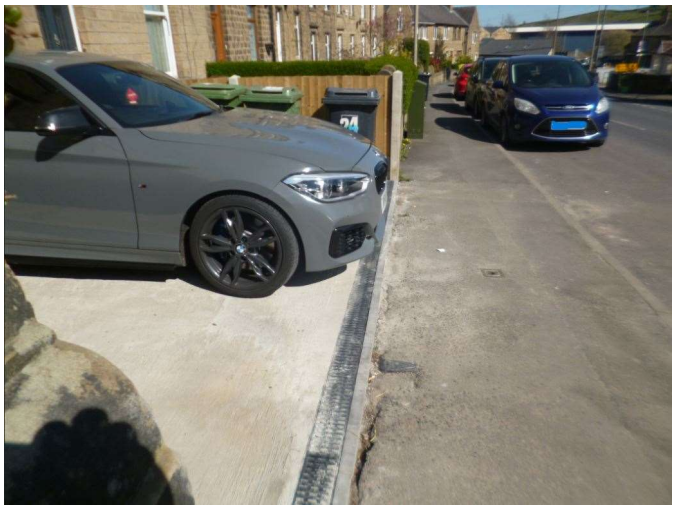

Planning Statement

The applicant was advised to apply for planning permission by the highways Service (ref RCT 744063) prior to any application to Highways as the crossing is from a classified road.

This statement is evidence for the planning application.

The occupant already parks his vehicle off road in front of the property on hard standing and has installed linear drainage to prevent water run off.

The picture below shows the occupants car on the hardstanding without interfering with the public pavement.

Further to the picture above the property at 56 Deighton Road with a similar size front area has developed for parking and has a drop kerb installed setting a precedent for approval.
