I see this development has been resurrected from a previous one that was withdrawn. My objections remain the same: - the access is on a narrow road between two blind corners. At the moment, traffic is hazardous due to the speeds cars come up Gynn Lane. A road junction here and the increased traffic would only make matters worse. Also it looks like a very steep access road. - will the construction of the access road involve a lengthy road closure ? Many people and delivery traffic would be forced to use Hall Ing Lane for access which is very steep and narrow and unsuitable for refuse wagons etc. - damage and disruption to wildlife, birds, and protected trees. - impact of 50 houses on surface water , as the bottom of Gynn Lane frequently floods in heavy rain - lack of amenities for children in the area, as there are no playgrounds. Also increased pressure on local schools.
