About the application

Application number: 2025/91370	
What is the application for?:	Demolition of existing dwelling and erection of 50 dwellings with associated acc
Address of the site or building:	Land at, Gynn Lane, Honley, Holmfirth, HD9 6LF
Postcode:	

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
My primary concern revolves around the profound and unacceptable impact this development will have on road safety in the immediate vicinity. The existing road infrastructure, specifically Gynn Lane, is already narrow and frequently congested by parked vehicles. This is exacerbated by its close proximity to Honley High School, which generates significant pedestrian and vehicular traffic during peak times (e.g., school drop-off and pick-up). The proposed development will undoubtedly lead to a substantial increase in vehicle movements, adding further pressure to an already overstressed system. This will inevitably result an increased traffic queues and delays, and a significant reduction in road safety. The combination of increased traffic, narrow roads, and the presence of schoolchildren creates a highly dangerous environment for pedestrians, cyclists, and motorists alike. There is inadequate space for safe pedestrian passage in many areas(narrow pavements etc), and the introduction of more vehicles will only amplify this danger. During peak congestion, the ability of emergency services to navigate these roads quickly and efficiently could be severely impeded, with potentially dire consequences. No mitigation measures proposed within this application could adequately address the fundamental road safety issues posed by additional traffic on these already unsuitable roads. The safety of our community, especially our children, must be paramount.
