FOUL DRAINAGE

Do the applicants and their agents not read the neighbour representations. In ID 1095168 I refer to supporting information Drainage/Foul sewerage assessment ID 1091728 page 4 second paragraph. This has not been withdrawn.
This paragraph is not this site at Honley! It refers to Rowley Lane and Penistone Road in Lepton. Is there a paragraph missing for this site in Honley?
In consultee response ID 1096809 Yorkshire Water Point 1. "The public combined sewer within Gynn Lane does not have the adequate capacity available to accomodate the anticipated foul water discharged from this proposal adjacent to the site"
Yorkshire Water require a robust build plan and start date so they can undertake an internal network reinforcement study to determine the suitable point(s) of connection to the available network along with the relevant time scale required for any upgrade work which they will facilitate.
Yorkshire Water has placed devices in two foul sewer manholes that I know of to measure the flow.
In neighbour representation ID 1095174 I refer to the footpath from No. 34 Gynn Lane over the stone bridge to Gynn Lane opposite No. 39. The foul sewer would not need to go under Ludhill Dyke and go a long way down Gynn Lane to access the foul sewer level if it went this way.
