I am very disappointed to see that even less attention has been paid to the particular ecology of this plot in the new application. There has been no industrial working in this area for over 25 years with the result that the diversity of woodland birds and animals we have seen has greatly increased. In February 2026 our garden was visited by 21 species of woodland birds. Their habitat is likely to be greatly disturbed by all the tree felling and other works to be undertaken. Together with the huge disruption likely to be caused by the impossible traffic conditions on Gynn Lane during and after the building it seems that the developers have no intention of improving the life and health of the Kirklees residents in this area.
