My concern is that my property along with others neighbour's is situated directly at the bottom of the slope to this proposed development site.
There are mine shafts within very close proximity as well mine adits underneath the properties. In addition to that we share a very tall retaining wall which runs along the back of our houses, and is directly underneath the slope of this site.
What guarantees do we have that the wall and our properties will not be damaged by subsidence or flooding.
Gynn lane and houses at the bottom of the lane are already impacted by flooding and neighbour’s gardens being directly affected by the 2025 investigations into the mining. Surely adding more housing will only add to these problems.
I could continue as there are so many more important and valid reasons why this development should be refused.
However there are many more comments already addressing those concerns, all of which I agree.
I submitted comments and signed a petition objecting to this plan in 2025.
I strongly urge that the planning authority refuse this application.
