I am very concerned that the planning application for the development of fifty houses on the lower section of Gynn Lane does not take into consideration any of the obvious existing hazards, regular flooding in gardens, roadside. The destruction of a beautiful local natural environment for bats, rooks, owls and deer. The hazardous entrance into the estate will be a flooding hazard and treacherous in snow or ice. The width of Gynn Lane and the existing school traffic in the morning and afternoon. The planning for fifty homes would mean at least one hundred extra cars accessing the lane, driving down adding to congestion or up through Hall Ing Lane which is narrow and single car width in places. An estate of this size has no place coming off a lane of this size and the destruction of a beautiful natural habitat is unthinkable.
