After carefully reviewing the application proposal, I feel this is a great opportunity for a business to be established on this derelict site, which will also provide housing and employment in Batley. A vehicle diagnostic centre will provide a much needed business in our locality. The proposal is a inhouse vehicle software diagnostic centre, which is all plug and play software systems and diagnostics with all modern electric cars. This is an ultra low noise business providing in house parking. I am in full support of this application, bringing modern technology is positive and is also the future technology.
