

7. Identification of Tree & Description of Work

T1 Sycamore - Left hand tree looking from the rear of the property. - Crown thinning 20%

T2 Maple - Right hand tree looking from the rear of the property. -Crown thinning 30%, Crown lifting to 6 meters & Crown reduction.

The tree has a large crown that is extending over a large portion of our garden and our neighbour's garden. The tree blocks all light to our and neighbouring properties. Small branches fall from the tree into our garden & neighbouring gardens. Earlier in the year a large branch fell from the tree that would have caused serious injury or damage if a person or property was struck. To prevent future incidents and ensure public safety we would like to trim the tree to a more manageable and safe size.

8. Additional Information
