Noise disturbance impacting leisure and residential quality of life Further air pollution with spread of concrete particles in the wind as plan shows vehicle tipper up to hopper for mixing. Particles could additionally contaminate the nearby stream affecting the watercourse and biodiversity generally. Already there is an industrial scale finishing works emitting a breath catching odour onto Wakefield Road and blowing several hundred yards up to properties on Almondbury Bank with such concrete particles possibly travelling for similar distances. We are not aware how any of this pollution could be hazardous to health. It is another encroaching industry on the edge of a residential area which is spoiling day to day living.
