This site is close to densely populated residential areas, allotments and wildlife habitats. There is a stream very close to the site that should be protected from pollution and the woodland next to the site is an important nature corridor which links to Longley Woods.

The site would certainly be noisy and generate dust and there would be additional heavy vehicles on the roads and on site. Heavy vehicles entering and leaving the site on to Almondbury Bank which is a steep and narrow road with lots of parked cars would be unsafe.

The application doesn’t give enough information particularly about times it would be running and whether there would be any mitigation of noise or dust which would be detrimental to health and settle on the allotments, natural areas and residential properties that surround it.

It seems very inappropriate for such an industrial proposal to be permitted in that location.
