I would like to object to the planning for this due to various reasons as a longstanding local resident.

My garden is a haven for birds, insects and local wildlife as well as my collection of roses. I do not rent further pollution and dust affecting my outside space for both myself and the wildlife that visit daily.
The current levels of pollution and dust living near to the current site as well as the cloth finishers further down the plot are already too high for local residents including myself and my neighbour. Regular fires, Lorry's, sand etc fills the air including weekends and must surely breach environmental health issues as it is.
The road on almondbury bank is already congested and additional heavy lorry's using the road as well as the small entrance onto the site is not suitable. Local cars parked on the roadside are often scratched due to the congestion and cars slamming on brakes to avoid Lorrie's turning onto the site- not to mention the constant horn sounding of the Lorrie's as they enter the site.
The planning does not state the hours of the new plant but their social media page states 24/7 which is not in keeping with the classification of the current industrial classification of the site.
We are all extremely worried that this permanent building and risk to health, noise, highways, and looking the area has not been considered at all and I can't believe that it has even got this far.
This residential area is not the right location for this type of business and the owner of the site and the company should explore more suitable premises in a location that is set up to accommodate their needs.
