I strongly object to the use of the proposed site for a concrete plant. The immediate surrounding area is heavily residential and such use of the site poses a risk of noise and air pollution, negatively impacting the health and wellbeing of residents in the area. It also serves to exacerbate a traffic issue on already tight roads near a busy junction with Wakefield Road, putting vehicles parked on Almondbury Bank at risk of damage due to large industrial vehicles entering and exiting the site. It will devalue surrounding properties and potentially infringe the privacy of neighbouring residents.

Concrete production plants also release pollutants into the surrounding ground and water sources, putting both at risk of contamination and making them harmful to wildlife in the area. They also produce large amounts of CO2 emissions, further damaging the environment.

I strongly urge you to consider rejecting this application on the above grounds.
