There are numerous reasons why this site would appear to be an inappropriate choice of location for industrial activity of this nature. It is a densely populated area and the impact of dust and pollution on those living nearby, especially those with respiratory vulnerabilities, could be considerable. The manufacture of concrete is likely to be noisy and to generate additional traffic, including HGV traffic for which local roads are not well-suited (especially the very tight junction where the driveway from the proposed site meets Almondbury Bank). There is also woodland within the immediate vicinity of the site which is home to a variety of wildlife, apparently including bats (a protected species). I would like to request the council's reassurance that the potential impact of concrete manufacturing on the health and wellbeing of the local community and on local flora and fauna will be thoroughly explored and taken into consideration before any planning decision is made? Thank you.
