Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
<p>The proposed development would lead to the destruction of a vital wildlife habitat. The site, with its mature trees and natural features, serves as an essential area for local biodiversity. The loss of this habitat would negatively affect a range of species and disrupt the delicate ecological balance of the area.</p> <p>A significant increase in traffic would be generated on a single-track road that is already at its capacity. This road serves multiple residents and is not designed to handle additional vehicle movements, creating a highly unsafe environment for everyone. This is particularly concerning for families with young children who use this road to access local cycle paths and footpaths. The possibility of increased traffic makes this development a serious risk to public safety.</p> <p>The negative impact on the environment, and the serious safety concerns regarding traffic and pedestrian access make this development unsuitable for this location.</p>
