<p>On behalf of the Huddersfield Civic Society Committee the response to the Planning Application 2025/65/91645/W is that we are in support of the majority of the proposals relating to Turnbridge Mills, Quay Street, Huddersfield, HD1 6QT (Grade II, 1871-3) for some demolition and redevelopment. The Heritage Statement is thorough and assesses the significance of the whole site, and the Sequential Options Assessment Revision A of June 2025 gives helpful background. Although we acknowledge there will be some loss of buildings we consider that it is important that the site is updated in order to give a long term and sustainable future. We note that the mill complex has been economically unsustainable for many years with underutilised buildings falling into increasing disrepair and insufficient funds to keep the listed buildings and others in good order. We particularly support the proposal to invest in the repair and maintenance of buildings, such as 'Block D' in the applicant's heritage document and to match these, where practical, in the new building designs. We also understand that the Spinning block ('Block B') and the boiler house 'Block C' and its linked buildings through to the listed chimney adjacent to the Lift Bridge scheduled monument (noting the chimney and Lift Bridge are to be retained) are proposed for demolition. We recognise that these buildings form a key part of the historic canalside setting of the chimney and lift bridge, but that the cost of their maintenance is considerable. We would welcome further consideration of these items in the hope that the serious concerns of Historic England, HBAP and the Victorian Society can be resolved.</p>
