

- Condition 12 (CEMP)
  - The Highways consultant's comments received on 15/07/2025 confirm that the submitted CEMP information is considered acceptable. The package is attached again just for completeness.
  - Further to comments raised in William's E-mail dated 17/07/25, please find attached a revised Site Setup Plan drawing (revision C) which has been updated to include a note that materials & loading/unloading will be carried out within the site compound. We also confirm that no artificial lighting will be provided as part of the site compound. We trust this is sufficient to allow the condition to be discharged.
