

## **Appendix A – Climate Change Statement**

### **Climate Change Statement for Planning Applications**

#### **Part 1: Applicant details**

|                            |  |
|----------------------------|--|
| Name of applicant/agent    | ACUMEN                                     |
| Site Address               | 10 Peat Ponds, Saledine Nook, Huddersfield |
| Description of Development | Erection of replacement dwelling.          |

#### **Part 2: Climate Change Mitigation measures**

|   |
|---|
| Please respond to the following questions considering the measures set out in the Climate Change Guidance note:   |
| Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)                                    |
| Low energy lighting<br>Maximising thermal insulation levels in external walls, floor and roof wherever possible   |
| Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3) |
| Contractors and materials will be sourced locally, wherever possible.<br>Materials ordered as and when required to reduce waste.  |
| Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)  |
| Materials to be used within the new build are wholly recyclable   |
| Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the   |

|   |
|---|
| Building Regulations ? (See section 5)  |
| The proposals need to comply with Part L, not surpass the regulations?  |
| Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)  |
| Flood risk does not apply to this application   |
| Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8) |
| Surface water attenuation will be provided if requested by the LLFA<br>Use of water butts to store and use rainwater for watering of garden areas where possible.                   |
| Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)  |
| None  |
| Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)  |
| None  |
