Comments

The applicant has submitted a Noise Impact Assessment authored by RP Acoustics Ltd dated 23 January 2026 Ref NIA/1505/26/605/v1.0/444 Wakefield Road which refers to a previous condition (6) under planning permission 2018/62/92301/W which relates to noise with particular reference to road traffic from Wakefield Road.

A 24hr baseline noise survey was carried out on Friday the 12th of December 2025 from two monitoring positions as shown in Appendix 4 and a summary of the findings is given in table 3.1. Based upon these findings, a minimum specification for glazing is required and as this is a retrospective application, the author states the installed double glazed windows ensure the levels meet with the internal requirement of BS8233. There is no defined external amenity area.

The submitted information is accepted.
