I understand that this is to review the *external lighting avoid disturbance to wildlife* aspect in Condition 27.

It would be good to know whether the external lighting scheme is in line with established guidance (e.g. Bat Conservation Trust and Institute of Lighting Professionals (2023) Bats and Artificial Lighting at Night).
If I could have confirmation , that would be most helpful.
Condition 27 is not yet met from an ecological standpoint.

Hope this helps.

Many thanks,
Katie
