Subject: Application 2025/62/91944/E

Elenya

Can you let me know what is happening in respect of this application please.

I am sceptical as to the future use of such an extension. The parking spaces appear to take part of the garden as the extension looks to be in the space where existing parking takes place. The increase in vehicles along Roebuck Street is not sustainable. I wish to put in objections to the plans in that use is not clear, the highway cannot take any extra vehicles. There is already problems on Roebuck Street with vehicles. It is a very narrow road and if vehicles are parked opposite existing driveways this could cause access problems for existing residents. The extension being on the boundary line of the neighbouring property will restrict light to the neighbouring property and not account of loss of visual amenity has been considered in the plans put forward.

Thanks

Liz
