<p>There is currently an ongoing process to regenerate Marsden I think a new shop front would enhance Peel Street where frankly many of the shop fronts are not up to standard that are required of a conservation area The application I believe would totally enhance the appearance of the the upper part of Peel Street bringing it back to nearer the original look (, the window has been changed prior to the conservation requirements)The application has a slightly larger wood profile in order to add double glazing, I do not think this an issue due to the large profiles of the windows , The councils target is net zero and clearly double glazing would meet this requirement as the property has already changed to LED lighting.</p>
