Dear Sir/ Madam

Re the above application; as a volunteer at The Cuckoo's Nest for nearly 20 years, I am part of a dedicated team, who work very hard to help make our charity shop such an asset to the community of Marsden ,by supporting local groups and events throughout the year.

The Committee are applying for the much needed replacement of the large rotting window frames and the installation of new double glazing, which make up the shop frontage.

If permission is granted ,such improvements would certainly benefit the immediate area of the main street of Marsden, making it more attractive for local people and visitors,of which there are many.

Our working environment too would be enhanced, especially in the cold winter months ,and apart from being more economical, would contribute towards the target of Net Zero.

Yours Sincerely.

The Old Barn
