

Plant Codes (see drawing 4207/1 for full schedule)

Code	Tree Name
AArH	Ameiarcher arborea Robin Hill
Ac	Acer campestre
ACE	Acer campestre 'Esterik'
ACS	Acer campestre 'Streetwise'
Ag	Alnus glutinosa
Aspe	Acer pseudoplatanus
Bp	Betula pendula
Cb	Carpinus betulus
Fs	Fagus sylvatica
MJG	Malus domestica 'James Grieve'
MRRP	Malus domestica 'Ribston Pippin'
Pa	Prunus avium
PaP	Prunus avium 'Plena'
PaS	Prunus avium 'Stella'
PCC	Prunus communis 'Concorde'
Pp	Prunus padus
PPan	Prunus 'Pandora'
Qr	Quercus robur
SaCR	Sorbus aucuparia 'Cardinal Royal'
SaJR	Sorbus aucuparia 'Joseph Rock'
Sau	Sorbus aucuparia
Tc	Tilia cordata

Code	Plant Name
DoGo	Deschampsia cespitosa 'Goldtau'
Pvil	Pennisetum villosum

Code	Tree Name
Cb	Carpinus betulus
Fs	Fagus sylvatica
GI	Grosselinia littoralis
LOA	Ligustrum ovalifolium 'Aureum'
Pl	Prunus laurocerasus
PxRR	Photinia x fraseri 'Red Robin'

Code	Plant Name
Native Hedge Mix (5m)	
Native Woodland Mix (0.25m <sup>2</sup> )	
Native Shrub Mix (0.5m <sup>2</sup> )	

Code	Plant Name
BAN	Berberis thunbergii 'Atropurpurea Nana'
CBM	Ceanothus 'Blue Mound'
Cr	Ceanothus thyrsiflorus repens
EISO	Euonymus fortunei 'Silver Queen'
Hs	Hebe 'Sutherlandii'
LaH	Lavandula angustifolia 'Hidcot'
PxRR	Photinia fraseri 'Red Robin'
PIOL	Prunus laurocerasus 'Otto Luyken'
Vd	Viburnum davidii
VI	Viburnum tinus

Code	Plant Name
Native Hedge Mix (4m)	
Native Shrub Mix (0.5m <sup>2</sup> )

**Planting Notes**  
 Topsoil shall be a minimum of 400mm depth over planting beds and graded to fall. Imported topsoil must be BS3882:2015 compliant and existing topsoil must be cultivated in accordance with BS3882: 2015. No cultivation should take place in wet/waterlogged conditions.  
 Herbicide and cultivation: Topsoil to be treated with two applications of herbicide prior to planting, where necessary, strictly in accordance with the Control of Pesticides Regulations 1986 (as amended) 1991 or otherwise.  
 Planting: All planting must be in accordance with BS3836 1992: Nursery Stock and BS 8545 2014: Trees from Nursery to Independence.  
 Trees: All tree planting should conform to BS5836:2014. Standard trees to be planted in pits 600x400x450mm or dimensions of rootball, whichever is greater. Heavy and Extra Heavy Standard trees to be planted in pits 1000x1000x600mm or dimensions of rootball, whichever is greater. Agrisure soil improver and 150g Emag (or equivalent) to be incorporated into the soil of all new tree pits. Trees to be planted centrally within a tree pit. Tree stakes shall be of metal, chestnut or other approved timber. They shall be round, rough sawn, straight, free from projections, large or edge knots and other defects and be pointed at the lower end. They shall be strong enough not to split when driven into the ground and when ties are nailed to them (both initially and when adjusted). For Feathered trees use 2hr stakes (1.4m by 50mm) to be driven into ground 800mm, leaving 600mm above ground. For Selected Standard Trees 2hr stakes (1.7m by 100mm) and cross bar are required; stakes to be driven 900mm below ground leaving 800mm above ground. For Heavy Extra Heavy trees use 2hr stakes (2.2m x 100mm) with a 400x100x5mm cross bar. Stakes to be driven into ground 1m leaving 1.2m above ground.  
 Tree ties: All tree ties to be Green-Tech Holidfast Natural Tree Ties. Natural tree tie is made entirely of natural fibres and is fully biodegradable. A spacer formed using the Natural tree tie itself. It will not strangle the tree and will biodegrade as the tree establishes itself.  
 Native Woodland / Shrub areas: Soil depth shall consist of 300mm topsoil and 600mm subsoil (in accordance with BS3882: 2015).  
 Container grown shrubs, transplants and whips: Shrubs and transplants shall be planted in pits 300x300x400mm depth, and the backfill shall include 3 litres of peat-free tree and shrub compost. Where two or more shrub species are indicated within a single bed each species shall be randomly mixed throughout the bed in groups of 3/5.  
 Mulch: Planting beds to receive 75mm depth patented ornamental bark mulch. Native woodland / shrub / hedgerow plants to be planted with Green's Mulch Mat - Type 11. Mulch Mats are 100% biodegradable with an approximate three year lifespan. Mulch Spats are ready-cut for automatic plant production with a centre hole for plant protection. Mats pinned to soil.  
 Plant position: Final position of trees and shrubs subject to confirmation of service location and approval of statutory undertakers.  
 Protection to planting: Native hedgerow plants, trees and shrubs within mires to be protected by Green-Tech Bio-Earth Tree Shelter. The Bio-Earth Tree Shelter is made from a special water-proof FSC-approved cardboard which is 100% biodegradable, recyclable, and compostable. Lifespan is typically 3 years. Once the tree / shrub has established enough to no longer need it, the Bio-Earth Tree Shelter can be left to biodegrade.  
 Ornamental hedging: Hedges to comprise a single row of plants, 400mm wide trench excavated to take plants and topsoil cultivated to 400mm depth prior to application of fertiliser.  
 Grass: All turf/seeded areas to be cultivated and levelled as required removing any stones, rubble, subsoil, general construction waste.  
 Planting Season: Bare-root shrubs to be planted between mid-November and mid-March dependent upon the planting season.
