Superb quality, very robust and delighted with them. Didn't really need the guide wire as they were hung over a short distance. Customer service is amazing and the light's arrived the very next day. Highly recommended!

5 star 

I've used these lights at my glamping site multiple times and they are the best quality by far and very robust. Wouldn't hesitate to recommend them they are brilliant 😁

Lighting Legends

Hi thank you so much for your fantastic 5-star review and the amazing photos! We're thrilled to hear that our lights have been a great addition to your glamping site and that you find them robust and high quality. We love your image so much it is featured on our home page! We truly appreciate your recommendation and your continued support. Thanks, Adam @ Lighting Legends.

Bought 37 meters for our back garden and they are amazing! Day time doesn't look as if they would be that bright but when night time came... I thought planes will be landing soon haha.

Lovely quality lights, look fab in the garden. One bulb blew when I turned the lights on, although there is one spare in the pack, Lighting Legends sent me two more to replace. The customer service was second to none and delivery was really on my order. Would definitely buy from this company again.

I ordered the heavy duty, outdoor lights. They are amazing and not too bright but not too dark- they're perfect. I have weaved them in with my Ivy and it has created a great ambiance. I ordered the extension too which was easy to attach. Great value for money and quick delivery. Would definitely rec ... show more

Ordered three altogether to join up to one power source - works brilliantly - easy to connect up.

Used plastic-coated steel line to hang lights onto as the weight of them would drag them down, I think. The effect in the garden is fantastic and received many compliments from family and friends. Hope ... show more
