**Our views are as follows:**

- **The new window on the side elevation, as per the plan should be obscure/frosted glazing, will this be enforced? Otherwise, it could be intrusive.**
- **There is currently a downstairs toilet with a window on the side elevation, it is not shown on the plan. It does not have obscured glass. Is this being removed or are the plans to be updated?**
- **Additionally, the extension is of a significant size that it could cause issues with water drainage/soakaway during periods of intense rain, is there a plan regarding this?**

Many Thanks
