<p>I think the houses should be built on the land. If they are not then the land will pose issues to the listed building known as Sunnybank (which was once a chappel). In time trees will grow right next to the building, impacting the live of the people who live there, the house known as 189 Woodhead Road would be completely over grown by trees and would castly impact the owners life of that property.</p> <p>The listed building itself which is over 100 years old, would have issues with tree roots growing right up to the foundations of the building and potentially making it unsafe. The proposed development itself would not impact the lives of the people opposite as the houses would be set back and down from the roadside. The cars would be parked off road and there would be no increase in traffic with cars parked on the roadside.</p> <p>The land is crying out to be developed and would be in the best interests for all concerned.</p>
