<p>I am writing in support of So Dough Pizzeria's application to install solar panels. This is a positive step that will not only help the business reduce its carbon footprint but also set a strong example for other local businesses in embracing sustainability.</p> <p>So Dough Pizzeria is an important part of our community, and by investing in renewable energy, they are showing real commitment to reducing reliance on fossil fuels and contributing towards our area's climate goals. The addition of solar panels will lower their energy costs, allowing them to remain a thriving local business while making an environmentally responsible choice.</p> <p>Approving this application would benefit both the business and the wider community, helping to create a greener, more sustainable local economy.</p> <p>I fully support this proposal and hope the council will approve it.</p>
