Postcode:	HD4 7AU

## User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
<p>I object to this application. This application has been made after a planning enforcement complaint. There are a number of windows that have been built in without the original planning consent. One window on the 1st floor side elevation looks directly into [redacted] it is not practical and it should not be there. It doesn't matter about the obscurity of the window because when the window is open [redacted] can see directly into [redacted]. The planning complaint was made in October of 2024 to this regard. These sort of actions totally undermine the planning process, putting windows in where you want, why do you need planning permission then? The direct impact of these window placements need to be assessed upon the impact on neighbouring properties.</p> <p>This is not a normal Variation application, the building work has already been done and the impact of this is already felt.</p>
