Subject: tru 2025/92438 at location Land off, Fitzwilliam Street, Huddersfield

Please see ecological commentary below:

Designations

No issue

Priority habitats and species

The Ecological Impact Assessment is reasonable and acceptable.

- Bats – the site is deemed to have low value for foraging and commuting bats. Two trees (T3 and T4) are observed to have potential for individual or low populations of roosting bats. These are to be retained onsite, and a protection condition will be provided. There are further lines of trees and hedgerows, which will also be protected under this condition.
- There are recommendations for birds and other species which will be covered in a CEMP. A lighting condition will also be included.
- It has been noted that invasive species are on the site (cotoneaster and Spanish bluebell). An invasive species condition will also be added.

BNG

The site is predominantly hardstanding, and no vegetation is to be removed. As a result, Biodiversity Net Gain is exempt as set out in Schedule 7A of the Town and Country Planning Act 1990 (as amended). Should more information come to light, please do let me know.

Suggested conditions

Habitats / Species

A condition for a CEMP: Biodiversity (Construction Environment Management Plan) is advised, e.g. No works shall take place until a Construction Environmental Management Plan (CEMP: Biodiversity) has been submitted to and approved in writing by the local planning authority. The CEMP (Biodiversity) shall include the following:

- a) Summary of potentially damaging activities
- b) Identification of "biodiversity protection zones"
- c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (these may be provided as a set of method statements)
- d) The location and timing of sensitive works to avoid harm to biodiversity features.
- e) The times during construction when specialist ecologists need to be present on site to oversee works.
- f) Responsible persons and lines of communication.
- g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.
- h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP: Biodiversity shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority.

Reason: In the interests of biodiversity and in accordance with LP30 and NPPF15

Invasive species

No works shall commence on-site prior to the completion of an invasive species survey and appropriate removal and / or management plan and agreed in writing with the council. Schedule 9 of the Wildlife and Countryside Act 1981 lists non-native species that are considered harmful to native biodiversity and habitats in the UK. It is illegal to release, plant, or allow these species to grow in the wild.

Reason: In order that the proposals are implemented in accordance with the Wildlife and Countryside Act 1981 (as amended).

Lighting strategy

No works are to commence unless a detailed lighting scheme, developed in accordance with established guidance (e.g. Bat Conservation Trust and Institute of Lighting Professionals (2023) Bats and Artificial Lighting at Night), has been drafted and agreed with the council. The Sensitive Lighting Strategy will demonstrate that the proposed lighting will not impact upon ecological networks and/or sensitive features. Thereafter the agreed lighting scheme shall be implemented, subject to any variations approved in writing by the planning authority. All external lighting shall be installed strictly in accordance with the specifications and locations set out within the Lighting Strategy.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Tree protection

A Hedgerow and Tree Protection Plan detailing measures for the protection of trees and hedgerows during the works will be submitted to and approved by the LPA prior to the commencement of works on site, including site clearance and delivery of materials.

Hedgerow and tree protection measures will include temporary fencing for the protection of hedgerows in accordance with BS 5837:2012 Trees in relation to design, demolition and construction – Recommendations. Any alternative fencing type or position not in accordance with BS 5837:2012 will be agreed in writing by the LPA prior to the start of development.

The root protection fencing will define the works exclusion zone around hedgerows and trees. Activities liable to be harmful to hedgerows and trees are prohibited within this exclusion zone, unless agreed in writing with the LPA. The approved hedgerow and tree protection measures will remain in place until the completion of development or unless otherwise agreed in writing with the LPA.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Many thanks,
Katie
