<p>I have lived in Woodsome Valley for over 20 years and wish to note that fox, deer, and field mice live in the valley immediately behind and to the sides of the proposed building site both in the surrounding open rural fields as well as the surrounding streams and hedges (I have photographic evidence). It is also the case that obvious animal trails including deer, fox lead to the stream immediately behind the proposed building site. The open land across from and surrounding the proposed building site is historically used for grazing and many of the surrounding fields have covenants placed on them to restricting use to grazing or agricultural use only. This congested development is not in character with the local pastoral environment or the surrounding grade II listed farm buildings and weavers cottages. I urge you to reject this proposal and protect and preserve the historic, ecological and rural nature of Lumb Lane and Woodsome Valley.</p>
