<p>I wish to submit the following objection.</p> <p>With the intended works proposed for the redevelopment / refurbishment of the market hall, I have concerns regarding the amount of market stalls being reduced. Whilst I welcome the glazed enclosure, it seems foolish to not include wide opening door sections , which will prove difficult for trader's access to load and unload their goods for their stalls. I have got the impression that no direct one-to-one consultations / communications have been made with stall holders to assess the practicality of the inteded design that befits their needs. It will also result in reduced accessibility for certain events such as the Autojumble, which is a popular event in the calendar. If the autojumble cannot be located there, then I have concerns that the event may be no more. Provison needs to be made to accomodate events such as these.</p>
