<p>Objection.....Reducing retail space by a third will destroy the viability of running the autojumble at the site.The autojumble has been an integral part of the local classic and modern motoring fraternity in Kirklees and the wider Yorkshire and beyond area for decades and should be taken as a historical must be included for plans going forward. The loss would be a massive blow not only to those who attend and bring trade to the area but also the traders themselves who offer personal services unequaled by online trading and the like. Without these traders the detrimental impact on the local motoring community would be massive as public attendees would seek services elsewhere away from Kirklees..I wholly object to these plans and request Kirklees commit to liaising with Phoenix Fairs to find a solution acceptable to both parties to ensure continuation of the Autojumble for attendance and enjoyment of Kirklees and wider community. Strategy for the site should be to embrace existing movements and encourage further expansion and use of retail trading space not reduce the site by a third losing in the process a third of traders making events less attractive by their reduced nature..</p>
