<p>This is close to green belt area, lots of habitat has already been lost a short distance away with the new build of Helme Fold and folly dolly areas also. Concern that we have a rewilding/conservation, landscape recovery project nearby- new generations of Barn owls nesting successfully nearby, bats, rare species of waxcap fungi and ancient hay meadows, all being protected and new and existing habitats supported- we cannot afford to lose any more precious habitat, these are old buildings. Plans are very vague- not specified size of new development, feel this will encourage further development in an area that is important to preserve the environment and esp mature trees and availability of old stable buildings and outhouses for swallows/owls/bats. This is not affordable housing being built.</p>
