<p>We object to this application on behalf of the residents of . When they purchased their property, it was indicated that the neighbouring site at 26 East Street would only be developed as a bungalow. The proposal now for a two-storey house is a significant departure from that understanding and raises several concerns.</p> <p>The increased height and scale of a two-storey dwelling will directly overlook multiple properties including the school my children attend, causing a loss of privacy. It will also reduce natural daylight, creating overshadowing and making multiple property feel enclosed. Additionally to that the property will ruin the entire look of all the enlisted properties on east street including the church. The proposed building is out of keeping with the immediate character of the street and ruining history, that should be.</p> <p>For these reasons, we request that dwelling is refused or revised to ensure it does not negatively impact Lindley, it's history, the schools and neighbourhood.</p>
