<p>Our back garden was previously part of the field in in this planning application many years ago and bought because they wanted to build a road or back road through to South Crosland which never happened, that field was part of South Crosland.</p> <p>At the moment our back garden is saturated with rain is this planning application going to make everything worse I sincerely hope that you get it right with the drainage.</p> <p>You are now creating a lot of hard standing, please remember that there is another field above that slopes in the same direction as this one where is that water flow going to go.</p>
