### Categories:

Hi There,

Please see ecological commentary below:

### Designations

Holme House Wood (LWS) and Holme House Grassland (LWS) are within 500m of the site.

### Onsite habitats and species

The Preliminary Ecological Appraisal is reasonable and acceptable.

There are recommendations for birds, hedgehogs, and other mammals. This can be covered by a CEMP. Lighting, tree protection, and enhancement conditions will also be added.

### BNG

The statutory metric is not available as part of this application and so the baseline BNG cannot be validated. Once the excel format of the metric is provided further commentary can be made on the BNG.

### Suggested conditions

BNG conditions will be provided once further clarifications are attained.

#### Habitats / Species

A condition for a CEMP: Biodiversity (Construction Environment Management Plan) is advised, e.g.

No works shall take place until a Construction Environmental Management Plan (CEMP: Biodiversity) has been submitted to and approved in writing by the local planning authority. The CEMP (Biodiversity) shall include the following:

- a) Summary of potentially damaging activities
- b) Identification of "biodiversity protection zones"
- c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (these may be provided as a set of method statements)
- d) The location and timing of sensitive works to avoid harm to biodiversity features.
- e) The times during construction when specialist ecologists need to be present on site to oversee works.
- f) Responsible persons and lines of communication.
- g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.
- h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP: Biodiversity shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority.

The CEMP must also include the following specific plans / documents:

- Mitigation / precautionary measures for the Holme House Wood (LWS) and Holme House Grassland (LWS).

**Reason: In the interests of biodiversity and in accordance with LP30 and NPPF15**

### Lighting strategy

No works are to commence unless a detailed lighting scheme, developed in accordance with established guidance (e.g. Bat Conservation Trust and Institute of Lighting Professionals (2023) Bats and Artificial Lighting at Night), has been drafted and agreed with the council. The Sensitive Lighting Strategy will demonstrate that the proposed lighting will not impact upon ecological networks and/or sensitive features. Thereafter the agreed lighting scheme shall be implemented, subject to any variations approved in writing by the planning authority. All external lighting shall be installed strictly in accordance with the specifications and locations set out within the Lighting Strategy.

**Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15**

### Tree protection

A Hedgerow and Tree Protection Plan detailing measures for the protection of trees and hedgerows during the works will be submitted to and approved by the LPA prior to the commencement of works on site, including site clearance and delivery of materials.

Hedgerow and tree protection measures will include temporary fencing for the protection of hedgerows in accordance with BS 5837:2012 Trees in relation to design, demolition and construction – Recommendations. Any alternative fencing type or position not in accordance with BS 5837:2012 will be agreed in writing by the LPA prior to the start of development.

The root protection fencing will define the works exclusion zone around hedgerows and trees. Activities liable to be harmful to hedgerows and trees are prohibited within this exclusion zone, unless agreed in writing with the LPA. The approved hedgerow and tree protection measures will remain in place until the completion of development or unless otherwise agreed in writing with the LPA.

**Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15**

### Enhancements

A Biodiversity Enhancement Management Plan must be provided to the LPA prior to the commencement of works on-site. It must include the following items that will be installed post development:

- 1 no bird boxes
- An increase in deadwood which will provide opportunities for a higher diversity of invertebrates. Small holes within fences (and other mechanisms) for hedgehogs' mobility.
- A planting scheme should be implemented within the scheme to create a trees and hedgerows. Plantings should comprise native species of high biodiversity value

**Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15**

Many thanks,  
Katie
