<p>The windows are an architecture feature which sets us apart from other buildings, is a useful internal space and makes my lounge feel bigger. The surveyors recommendation was to re-clad with UPVC and not to remove/replace. Two residents (not PfP/RMG) conversed opinion. 5 no response, 6 did not mind either way, 2 to re-clad, 8 to remove/replace. Did the survey consider the reduction of light into the properties. Will my property be de-valued. Why are they not replacing with triple glazing. When we purchased the flat PfP did not provide any documents stating they had the legal right to structurally alter my property. I asked for a proper survey of residents to be conducted by PfP/RMG giving the pro's and con's which was refused.</p>
