Premises - Miller and Carter Mirfield, Leeds Road, Mirfield, WF14 0BY

Works - Tree Felling

Scope

The request from the client is to fell an Ash tree that is growing against the wall as indicated on the attached plan and shown in the photographs.

On inspection the tree was a large mature Ash that is growing within close proximity (solid contact at base) to the retaining wall. The tree is causing potential damage to the wall and a request from Mitchells and Butlers has been received to remove the tree. It was noted that the tree did appear to have die back within the crown and a potential cavity within the stem, although the depth is unknown.

This quotation provides a cost for the removal of the tree, felling as close to the ground as possible, and treatment of the stump to prevent future regrowth.

Method

Ground Control will provide a team to carry out the following work:

- Prior to commencing the work, the team will set up a safe work area with the use of cones/barriers.
- With the use of a MEWP to gain safe access to the crown, the team will use a chainsaw to carefully section fell the tree.
- The limbs will be lowered into a designated drop zone with the use of approved lowering equipment.
- The waste will be processed through a woodchipper and removed from the site for suitable disposal.
- The stump will be treated with eco plugs to help prevent regrowth.

Supporting information

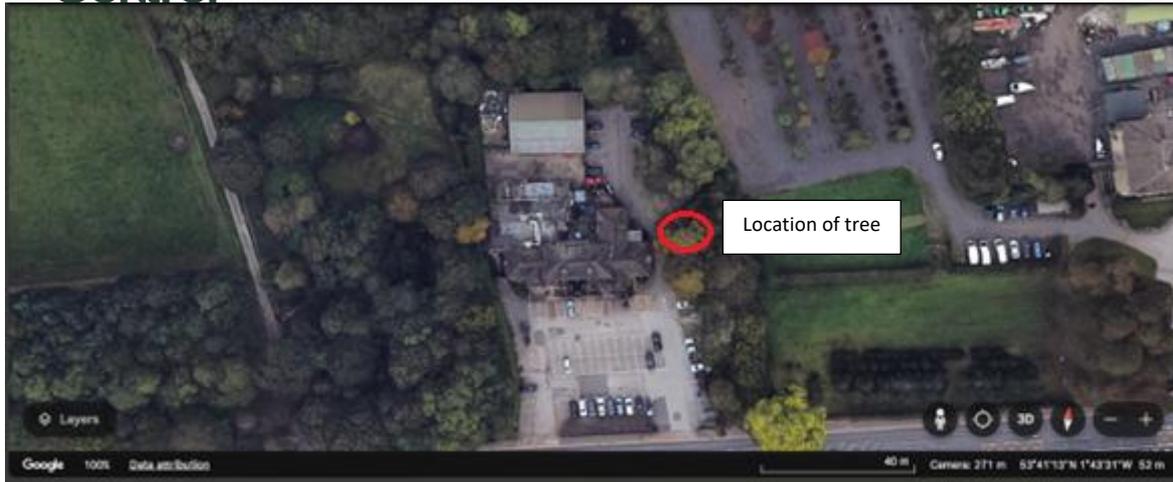

Map

I attach a site plan, taken from Google, with pins to mark the areas where each of the quoted works outlined will take place.

Services we offer- Landscape Construction, Arboriculture, Winter Maintenance, Pothole Repairs, Electric Vehicle Charge Point Installations, Treatment of Invasive Weeds and Design.
