<p>We Object to this application in many areas This application is in a unspoilt area of Meltham and Huddersfield and is situated literally within 10 meters of the Peak District The business will change the character of this rural area and offer no positive aspects or benefits The conversion of an agricultural barn to a business will be a loss to the local environment and change the feature of the area Access to the property is on a Public Bridalway which is the gateway to the Peak District and moorland it is used by horse riders, cyclists and families often with young children any increase to traffic and parking will have a negative impact. This is an area of outstanding beauty and in the Green Belt which by its very nature should remain unspoilt and every effort should be made to protect it.</p>
