| <p>My objections are to the opening of a business in this green belt area of Meltham which is probably the most rural and unspoilt part of Meltham. This business is already operating without planning permission and the use of the lane has considerably increased. The increased traffic is not just damaging to the bridal way but also poses an increased risk to the public in general.</p> <p>This part of Red Lane now has commercial advertising signs which spoils the outlook and further attracts increased vehicle use.</p> |                              |
