Subject: Planning Application 2025/44/92737/E

Dear Louise,

I would like my comments lodged against the case file for the above planning permission.

I have grave concerns about the safety of myself but mainly my children . The splays on the diagram show that you can see down the street where my large bush is at the front of my house and this is not true. I have attached photographs to demonstrate this. I have had no Acknowledgement that this is ok or that this is taken into consideration when approving planning permission, I have raised this at every opportunity. I will not be able to pull out of my drive way safely in my car, but more importantly my children will not be able to safely cross the road to go to school. I will already have to compromise my privacy at the back of my house should these houses be built, I shouldn't have to compromise it at the front because somebody wants to build a road for their convenience/gain at my detriment and the detriment to the safety of my children.

Thank you for taking the time to read this, I would appreciate a response to this email to ensure receipt of it and to outline if planning is approved how the safety of my children is going to be ensured.

Kind regards
