Dear Sir

Land south of Granny Lane, Mirfield, WF14 8LA (Ref. 2024/92702)

Further to Kirklees Council Environmental Health department's Consultation Response Ref. WK/202432184 dated 22nd November 2024, we are writing to provide additional information to support the discharge of Condition 15. The Consultation Response states:

While the information provided is acceptable, additional information is needed to fully meet the condition requirements. This includes waste transfer notices for material removed from the paddock and confirmation that remaining gardens across the site are underlain by natural soil. For these reasons, we recommend that Condition 15 remain until further notice.

The Remediation Statement (Ref. 2935/2D dated November 2022) stated that the *Brickfill* and *Granular Made Ground* soil types were suitable for retention and re-use on site. Where in-situ, these made ground materials were at sufficient depth not to pose any risk to human health (future residents), but any development arising containing these materials would require isolation beneath a minimum 600mm clean soil cover where retained beneath gardens or soft landscaped (POS) areas.

Hardcore, considered unsuitable for retention near-surface beneath gardens at shallow depth, was identified in the area of plots 31 to 37.

Topsoil from the former paddock area was originally deemed suitable for re-use within POS areas only, but was not to be retained beneath the proposed play area. However, due to asbestos contamination identified during the soil strip, this topsoil was subsequently deemed unsuitable for re-use on site.

Miller Homes and their Contractor (B Gallagher Construction, BGC) have advised that made ground development arising have only been replaced, at least 600mm below finished ground levels, beneath the gardens of plots 38 to 41 and around the surface water attenuation tank located within the public open space (POS) area immediately to the west of the site entrance.

The Verification Report (Ref. 2935/3 dated November 2023), plus subsequent soil cover validation certificate for plot 31 (dated 30th July 2024), confirmed that no made ground is present within 600mm of the finished ground surface beneath the gardens of plots 31 to 41 and the POS in the area of the attenuation tank.

Miller and BGC have confirmed that no made ground has been redistributed to any other areas of the site (i.e. the remainder of the former 'greenfield' area, the majority of the site area). Where some limited filling was required to achieve development levels, this was undertaken using only development arising from the greenfield area of the site.

Any further surplus made ground development arisings, and the paddock topsoil, have been removed from site. Copies of the Waste Transfer Notes relating to this removal are copied to Appendix A of this letter.

By signature below, Miller and BGC confirm that the above provides an accurate account of the works undertaken.

Should you require any further information, please contact the undersigned.

Yours sincerely

Steve James
