| <p>I object to the proposed development of this land primarily due to its important biodiversity and nature value. Shepley has seen a significant amount of new housing development in recent years, largely on brownfield sites, but at a time when we are facing a climate crisis and a biodiversity crisis, developing green sites is entirely counterintuitive. We desperately need to protect such sites for the benefit of society and the environment.</p> <p>I further object to this development as we are already seeing the impacts of a rapidly increasing Shepley population with no associated increase in public service provision. The school will not grow to accommodate more children and the surgery will have no additional appointments. Further, the public transport provision in Shepley is very poor, meaning that more houses will mean more cars on the busy and dangerous road network. All the above will have a negative effect on social cohesion and community.</p> | |
