<p>I object to this planning proposal for housing on Green Belt land. This is farming land . We will soon run out of home grown food and crops if this trend continues. This is not Grey Belt, it's village Green Belt.</p> <p>Shepley Spring is a local employer with a reputation for a safe and natural water supply from its underground spring. The water is drawn from where part of this development will be built. Any contamination of this spring from sewage or leaks will be a disaster for the village and this company.</p> <p>The small doctor's surgery on Jos Lane is already working to capacity as it services many small villages. The pressure put onto these services by 100's more houses will be catastrophic.</p> <p>Shepley First School is already full. It's a listed building and cannot be extended due to its position and protection. With 100's more houses being build in Shepley it will not be able to cope with the number of children to be educated locally.</p> <p>The traffic is already a major problem on the school run. The volume of traffic from HGV from this site is a major road safely issue. The proposal by the building firm to have a one way system which comes out down Lea Drive is quite frankly terrifying. It's a fatality waiting to happen. Any ice, snow or braking failure on this junction will be catastrophic.</p> <p>There is a planning consent at Bromley Farm, Upper Cumberworth for a quarry which will bring a huge number of HGV onto the A629. This development will only add to the volume of traffic through these small villages. The Sovereign Crossroads and the Carr Lane / Cross Lane crossroads are already accident black spots .</p>
