<p>I am writing to object to the planning application at Eastfield, Shepley with the following reasons.</p> <p>This is green belt land for agricultural purposes and whilst farming is not currently seen as an essential industry, if the fields are built on they are lost forever.</p> <p>The potential damaging impact to the water table and aquifer which is used as the source for the Shepley Spring Water factory, any spoilage or leakage would have a catastrophic effect on their business, with the risk of loss of much valued local employment and the knock on effect of less local spending by the company and employees also reduced tax revenues for the both local council and national government.</p> <p>The increased demand on the local Doctors surgery resulting in delays and longer waiting times for essential appointments and clinics.</p> <p>The increased need for additional school places at the local village school which may not be accommodated.</p> <p>The increased pressure on local infrastructure, water, broadband and roads. YWA have no plans to increase the current supply offering. We have all experienced delays, stress and inconvenience from the breakdown in the current pipeline , ie water leaks damaging the local road network.</p> <p>The increase in road traffic to our already oversubscribed and under resourced road network, which will result in an increase of several hundred vehicle movements daily.</p> <p>And finally the proposed introduction of a one way system on Knowle Park Avenue & Lea Drive to enable HGV vehicle access to and from the site, this solution is not fit for purpose, the roads are too small for very large vehicles and painting double yellow lines will have no impact at all. Plus you will have conflict with HGV traffic entering and leaving the water factory</p>
