<p>The proposed development of the Eastfield green belt land is not acceptable on a number of issues and I strongly recommend that Kirklees council reject the proposal. The village already has had several new housing developments in the last few years which have added to the congestion on the main A629 into Huddersfield. They have also caused parking issues on Station Road with people visiting the convenience store and coffee shop. Anymore houses would just add to this and make a danger to life a very real possibility.</p> <p>The proposed development is next to the main employer of Shepley , namely Shepley Spring. The livelihood of the business and its employees depends on the clean spring which flows under this area. The proposed development could put this clean water at risk , and as a result the jobs and business in the future.</p> <p>The amenities of the village already pushed to their limits , will not be improved by this development. The doctors surgery, the village school , the small convenience store ,and the railway station will all be impacted , and result in a negative knock on effect on existing villagers life and safety.</p> <p>In short I can see only negatives from this development, and urge the council to reject it.</p>
